Come and experience such unique service, Our 1Z0-1060-20 practice materials do not need any ads, their quality has propaganda effect themselves, It is absolutely trustworthy website.

No matter which method you choose, as long as you ask for 1Z0-1060-20 learning materials, we guarantee that we will reply to you as quickly as possible, Once you pay for the 1Z0-1060-20 exam torrent, you have the one year right to use it without repeat purchase.

To cope with the fast growing market, we will always keep advancing and offer our clients the most refined technical expertise and excellent services about our 1Z0-1060-20 exam questions.

If you use our learning materials to achieve your goals, we will be honored, 1Z0-1060-20 certification has great effect in this field and may affect your career even future.

Top 1Z0-1060-20 Latest Exam Online & Top Oracle Certification Training - Useful Oracle Oracle Accounting Hub Cloud 2020 Implementation Essentials

We offer you our 1Z0-1060-20 test braindumps: Oracle Accounting Hub Cloud 2020 Implementation Essentials here for you reference, But you have our guarantee, with the determined spirit of our company culture "customers always come first", we will never cheat our candidates.

There is no exaggeration that over the ten years our company has always been engaged in promoting the quality of our 1Z0-1060-20 dumps torrent materials, our first class exports who are from many different countries just gathered together to contribute wisdom and strength to improve the quality of our 1Z0-1060-20 practice questions in order to help all of the workers in this field.

We give our buyers with the most authentic & [New C-ACTIVATE13 Test Test](#) correct study material with 100% Exam passing & Money back Guarantee, At present, many candidates are choosing 1Z0-1060-20 valid training material as their study reference to get certified in 1Z0-1060-20 exam certification.

You know it is one of the best preparation tools I've ever [C-SACP-2107 Dumps Free Download](#) used, At the same time, our competitors are trying to capture every opportunity and get a satisfying job.

So i bought the 1Z0-1060-20 dumps from this site.

NEW QUESTION: 1

You are planning the consolidation of the databases from Host1. You need to identify which methods to use to back up the data after the consolidation completes. What are two possible methods that achieve this goal? Each correct answer presents a complete solution.

- A. BACKUP TO URL
- B. a maintenance plan
- C. AlwaysOn Availability Groups
- D. AlwaysOn failover clustering

Answer: A,B

Explanation:

Topic 1, Proseware, Inc.

Overview

General Overview

Proseware, Inc. is a software engineering company that has 100 employees. Proseware has sales, marketing, accounts, human resources IT, and development departments.

The IT department has one team dedicated to managing the internal resources and one team dedicated to managing customer resources, which are located in the company's hosting environment.

Proseware develops websites, basic web apps, and custom web apps. The websites and the apps are hosted and maintained in the hosting environment of Proseware.

Physical Locations

Proseware has two offices located in Seattle and Montreal. The Seattle office contains all of the hardware required to host its customers' websites, web apps, and databases. The Seattle office contains the IT team for the hosting environment.

The Montreal office contains all of the hardware required to host the company's internal applications, databases, and websites.

Each office connects directly to the Internet. Testing reveals that the minimum latency from the offices to Microsoft Azure is 20 ms.

Existing Environment

Internal Microsoft SQL Server Environment

Proseware uses a custom customer relationship management (CRM) application.

The internal Microsoft SQL Server environment contains two physical servers named CRM-A and CRM-B.

Both servers run SQL Server 2012 Standard and host databases for the CRM application.

CRM-A hosts the principal instance and CRM-B hosts the mirrored instance of the CRM database. CRM-A also hosts databases for several other applications that are used by the company's internal applications.

CRM-A has a quad core processor and 12 GB of RAM. CRM-B has a dual core processor and 8 GB of RAM.

Custom Web Applications Environment

Some Proseware customers request custom web-based applications that require more than just databases, such as SQL Server Integration Services (SSIS) and CLR stored procedures.

Proseware uses a Hyper-V server named Host1. Host1 has four instances of SQL Server 2014 Enterprise in the host operating system. The instances are mirrored on a server named Host2.

Host1 also hosts four virtual machines named VM1, VM2, VM3, and VM4. VM1 has SQL Server 2005 Standard installed. VM2 has SQL Server 2005 Enterprise Edition installed. VM3 has SQL Server 2008 Standard Edition installed. VM4 has SQL Server 2008 R2 Standard Edition installed.

Host1 uses a SAN to store all of the data and log files for the four SQL Server instances and the four virtual machines.

Websites and Basic Web Apps Environment

Proseware has two physical servers named WebServer1 and WebData1. WebServer1 hosts basic web apps and websites for its customers. WebData1 has a database for each website and each

basic web app that Proseware hosts. WebData1 has four cores and 8 GB of RAM.

Each website database contains customer information for billing purposes. Proseware generates a consolidated report that contains data from all of these databases.

The relevant databases on WebData1 are:

*CWDB: Currently 60 GB and is not expected to exceed 100 GB.

CWDB contains a table named Personallinfo.

*MovieReviewDB: Currently 5 GB and is not expected to exceed 10 GB.

Marketing Department

Proseware has a web app for the marketing department. The web app uses an Azure SQL database. Managers in the marketing department occasionally bulk load data by using a custom application. The database is updated daily.

Problem Statements

Proseware identifies the following issues:

* Lack of planning and knowledge has complicated the database environment

* Customers who have web apps hosted on Webserver1 report frequent outages caused by failures on WebData1. The current uptime is less than 90 percent .

* internally users complain of slow performance by the CRM application when the databases fail over to CRM-B

* WebData1 has no high availability option for the databases or the server.

* An internal licensing audit of SQL Server identifies that Proseware is non compliant. Host1, CRM- A, and CRM-B are licensed properly. VM1 VM2, VM3, VM4, and WebData1 are unlicensed.

Business Requirements

Proseware identifies the following business requirements:

Security Requirements

Proseware hosts a database for a company named Contoso, Ltd. Currently, all of the employees at Contoso can access all of the data in the database.

Contoso plans to limit user access to the CWDU database so that customer service representatives can see only the data from the PersonalInfo table that relates to their own customers.

NEW QUESTION: 2

Refer to the exhibit. If the devices produced the given output, what is the cause of the EtherChannel problem?

A. There is a speed mismatch between SW1's Fa0/1 and SW2's Fa0/1 interfaces.

B. SW1's Fa0/1 interface is administratively shut down.

C. There is an encapsulation mismatch between SW1's Fa0/1 and SW2's Fa0/1 interfaces.

D. There is an MTU mismatch between SW1's Fa0/1 and SW2's Fa0/1

interfaces.

Answer: A

NEW QUESTION: 3

NO: 211

Reporting from a Star schema is simpler than reporting from a normalized online transactional processing (OLTP) schema. What are the reasons for wanting simpler reporting? (Choose all that apply.)

- A.** A Star schema typically has fewer tables than a normalized schema. Therefore, queries are simpler because they require fewer joins.
- B.** There are specific Transact-SQL expressions that deal with Star schemas.
- C.** A Star schema is standardized and narrative; you can find the information you need for a report quickly.
- D.** A Star schema has better support for numeric data types than a normalized relational schema; therefore, it is easier to create aggregates.

Answer: A,C

NEW QUESTION: 4

If a Security Group is the Source for a General Logical Firewall Rule, which Virtual Machines will be affected by the rule?

- A.** Each Virtual Machine defined in the Source and Destination fields of the Logical Firewall Rule.
- B.** Each Virtual Machine identified in the Applied To field of the Logical Firewall Rule.
- C.** Each Virtual Machine identified in the Destination field of the Logical Firewall Rule.
- D.** Each Virtual Machine defined in the Security Group.

Answer: B
