NEW QUESTION: 1

You are the Office 365 administrator for your company's

Microsoft Exchange Online environment. The company recently subscribed to the Office 365 Enterprise E3 plan. Employees currently archive old email messages in .pst files. The company has now mandated that all email messages stored in .pst files must be archived online. You need to enable archiving for all mailboxes. How should you complete the relevant Windows PowerShell script? To answer, select the appropriate cmdlet from each list in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

In-Place Archiving helps you regain control of your organization's messaging data by eliminating the need for personal store (.pst) files. With archiving enabled, users can store messages in an archive mailbox, also called an In-Place Archive, which is accessible by using Microsoft Outlook and Outlook Web App.

In this question, we use the Get-Mailbox cmdlet to retrieve a list of all mailboxes.

The -Filter {(RecipientTypeDetails -eq 'UserMailbox')} option is used to retrieve a list of user mailboxes only (thus excluding Room mailboxes, Resource mailboxes etc).

The Enable-Mailbox -Archive command is used to create an archive for each user mailbox returned by the Get-Mailbox command.

NEW QUESTION: 4

Your client has a large campus recruiting initiative for several intern requisitions. The recruiters receive a large volume of resume at campus recruiting events. The recruiters would like to quickly pull these resumes into the system associated while collecting information that they have learned from the candidate on the spot such as date of availability and current GPA. Once you have constructed the Candidate file with the type "Create Candidate" that has all of your desired fields, what is the next step?

- A. Activate the File as the default Activated candidate file for viewing and editing general profiles.
- B. In Candidate File Setup Editor Activate the file for "viewing and editing Job-specific submissions* with the Campus Staffing Type.
- C. In Candidate File Setup Editor Activate the file for "creating Job-specific submissions' with the Campus Staffing Type.
- D. In Candidate File Setup Editor Activate the file for the "quick creation of candidate profiles" as the default.

Answer: C

Explanation:

Candidate File Setup and Requisition File Setup The Candidate File Setup and Requisition File Setup features allow system administrators to indicate in which situations user-define files will be used and to associate user-defined files to staffing types. System administrators first define a primary file. Then, if desired, they can set a different file to be used for each staffing type. If a staffing type is not specified, the default file will be used.
