Answer: A,D,E

NEW QUESTION: 2
A company plans to deploy an IBM Security Access Manager for Enterprise Single Sign-On solution to help address security and productivity issues. According to its corporate security policy, the organization has detailed requirements related to password management for its enterprise applications.
Which security requirements (with regard to user ID and password) need to be captured?
A. Policy requirements related to the number of applications that a user can access
B. Details related to application user ID requirements
C. Policy requirements for application and user initiated password resets and password complexity
D. User ID and password policy requirements are best addressed within the application space rather than in an Enterprise Single Sign-On project.
Answer: D

NEW QUESTION: 3
Ursa Major Solar is changing from quarterly sales performance reviews to monthly sales reviews.
Which feature of Collaborative Forecasts allows an administrator to ensure that Collaborative Forecasting aligns with the company's new monthly sales performance review?
A. Enable forecast rollups
B. Configure default forecast display
C. Enable forecast adjustments
D. Configure forecast types
Answer: D

NEW QUESTION: 4
Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others

might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are designing an Azure solution for a company that has four departments. Each department will deploy several Azure app services and Azure SQL databases.
You need to recommend a solution to report the costs for each department to deploy the app services and the databases. The solution must provide a consolidated view for cost reporting.
Solution: Create a resources group for each resource type. Assign tags to each resource group.
Does this meet the goal?

A. Yes
B. No

Answer: A

Explanation:
Tags enable you to retrieve related resources from different resource groups. This approach is helpful when you need to organize resources for billing or management.
