E. Option D
Answer: B,E
Explanation:
Explanation
The transport layer segments data into smaller pieces for transport. Each segment sequence number, so that the receiving device can reassemble the data on arrival.
The transport layer also use flow control to maximize the transfer rate while minimizing the requirements to retransmit.
For example, in TCP, basic flow control is implemented by acknowledgment by the receiver of the receipt of data; the sender waits for this acknowledgment before sending the next part.
