As the employment situation becoming more and more rigorous, it's necessary for people to acquire more C-BOWI-43 skills

and knowledge when they are looking for a job.

NEW QUESTION: 1

Due to limited resources, a company must reduce their hardware budget while still maintaining availability. Which of the following would MOST likely help them achieve their objectives?

- A. Remote access
- B. Blade servers
- C. Virtualization
- D. Network access control

Answer: C

Explanation:

Because Virtualization allows a single set of hardware to host multiple virtual machines, it requires less hardware to maintain the current scenario.

Incorrect Answers:

B. Remote Access Services (RAS) refers to any server service that offers the ability to connect remote systems. It will not, however, reduce the number of physical servers.

C. Operational security issues include network access control (NAC), authentication, and security topologies after the network installation is complete. Operational security encompasses everything that isn't related to design or physical security in your network. Instead of focusing on the physical components where the data is stored, the focus is on the topology and connections.

D. A blade server is a stripped down server computer with a modular design optimized to minimize the use of physical space and energy. It will not, however, reduce the number of physical servers.

NEW QUESTION: 2

Welche Aufgaben können Sie an einem Fertigungsauftrag in einem Kundenauftragsszenario mit bewertetem Bestand durchführen?

Es gibt ZWEI richtige Antworten auf diese Frage

- A. Die Abweichungen an CO-PA abrechnen
- B. Produktionsabweichungen berechnen
- C. Transferreserven für realisierte Kosten
- D. Ergebnisanalyse durchführen

Answer: A,D

NEW QUESTION: 3

HOTSPOT

You have a server named Server1 that runs Windows Server 2016.

Server1 is a Hyper-V host.

You have two network adapter cards on Server1 that are Remote Direct Memory Access (RDMA)-capable.

You need to aggregate the bandwidth of the network adapter cards for a virtual machine on Server1. The solution must ensure that the virtual machine can use the RDMA capabilities of the network adapter cards.

Which command should you run first? To answer, select the appropriate options in the answer area.

Hot Area:

Answer:

Explanation:

NEW QUESTION: 4

What is a security policy?

- A.** An XML file that must be manually created and configured so the S-TAP can understand the nature of the traffic that it reports on.
- B.** A series of transactions where the data server communicates with the collector and shares its current security status.
- C.** A Guardium object containing an ordered set of rules that are applied to the observed traffic between clients and data servers.
- D.** A specially-formatted document from a government or third-party institution that can be imported into Guardium for easy audit configuration.

Answer: C
