íŠ¸ë¦¬ê±°í•©ë<ˆë<¤.
Answer: A
Explanation:
Explanation
As an administrator of the master account of an organization,
you can restrict which AWS services and individual API actions
the users and roles in each member account can access. This
restriction even overrides the administrators of member
accounts in the organization. When AWS Organizations blocks

access to a service or API action for a member account a user or role in that account can't access any prohibited service or API action, even if an administrator of a member account explicitly grants such permissions in an IAM policy. Organization permissions overrule account permissions.
Option B is invalid because service policies cannot be assigned to the root account at the account level.
Option C and D are invalid because IAM policies alone at the account level would not be able to suffice the requirement For more information, please visit the below URL id=docs_orgs_console
https://docs.aws.amazon.com/IAM/latest/UserGi
manage attach-policy.html
The correct answer is: Create a Service Control Policy that denies access to the services. Assemble all production accounts in an organizational unit. Apply the policy to that organizational unit Submit your Feedback/Queries to our Experts

NEW QUESTION: 4
Which tool provides information on power when sizing an HP ProLiant BL460c server solution?
A. HP Systems Selling Guide
B. HPBladeSystem Power Sizing Tool
C. HP Capacity Advisor
D. HPBladeSystem Power Analyzer
Answer: B
