NEW QUESTION: 1

You just installed a new Web server in the DMZ that must be reachable from the Internet. You create a manual Static NAT rule as follows:

```
Source: Any || Destination: web_public_IP || Service: Any ||  
Translated Source: original || Translated Destination:  
web_private_IP || Service: Original
```

"web_public_IP" is the node object that represents the new Web server's public IP address.

"web_private_IP" is the node object that represents the new Web site's private IP address. You enable all settings from Global

Properties > NAT.

When you try to browse the Web server from the Internet you see the error "page cannot be displayed". Which of the following is NOT a possible reason?

- A. There is no NAT rule translating the source IP address of packets coming from the protected Web server.
- B. There is no Security Policy defined that allows HTTP traffic to the protected Web server.
- C. There is no route defined on the Security Gateway for the public IP address to the Web server's private IP address.
