introduction of the features and the functions of our CTFL_Syll2018_SEE learning questions, We value our repute and think highly of every buyers' comments.

include include include multiple pieces of equipment that you can configure.

NEW QUESTION: 1
A VMFS5 datastore shows several errors, which suggests file system corruption. Which tool could a vSphere administrator use to check the VMFS file system?
A. vSphere On-disk Metadata Analyzer (VOMA)
B. vSphere Storage APIs for Storage Awareness (VASA)
C. VMware Infrastructure Management Assistant (VIMA)
D. VMware vSphere Health Check Analyzer (VHCA)
Answer: A

NEW QUESTION: 2
You are the administrator for a company. All devices run Windows 10 Enterprise.
The Multiple Activation Key (MAK) that you use is compromised.
You have been issued a new MAK.
You need to implement a script that updates the key for devices and forces the devices to perform online activation.
Which three actions should you include in sequence in the script? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:
Explanation:

Explanation

NEW QUESTION: 3
You have a web site that is sitting behind AWS Cloudfront. You need to protect the web site against threats such as SQL injection and Cross site scripting attacks. Which of the following service can help in such a scenario Please select:
A. AWS Inspector
B. AWS Config
C. AWS WAF
D. AWS Trusted Advisor
Answer: C
Explanation:

The AWS Documentation mentions the following
AWS WAF is a web application firewall that helps detect and
block malicious web requests targeted at your web applications.
AWS WAF allows you to create rules that can help protect
against common web exploits like SQL injection and cross-site
scripting. With AWS WAF you first identify the resource (either
an Amazon CloudFront distribution or an Application Load
Balancer) that you need to protect.
Option A is invalid because this will only give advise on how
you can better the security in your AWS account but not protect
against threats mentioned in the question.
Option C is invalid because this can be used to scan EC2
Instances for vulnerabilities but not protect against threats
mentioned in the question.
Option D is invalid because this can be used to check config
changes but not protect against threats mentioned in the quest
For more information on AWS WAF, please visit the following
URL:
https://aws.amazon.com/waf/details;
The correct answer is: AWS WAF

NEW QUESTION: 4
A company has 1,000 Cisco switches in their environment that
send approximately 5,000 traps each to the Netcool system in a
24 hour period. In addition to this, they have 5,000 servers
and workstations; each sending approximately 100 syslog
messages to IBM Tivoli Netcool/OMNIbus in the same time period.
Based on the scenario above, what is the calculated event rate
per 24 hours?
A. 2t500,000 events
B. 5,500,000 events
C. 6,000,000 events
D. 1,000,000 events
Answer: C
