Yes, you can review your marked questions at any time during your work [IIA-BEAC-EC-P2 Reliable Braindumps Book](#) session, To make sure our guests can study in various ways, we have brought out three different versions to fulfill the need of our guests.

NEW QUESTION: 1

Select the three statements that are true about the Project management Plan.

- A. It provides a framework for the Analysis and Design processes.
- B. Its main focus is on scheduling the project.
- C. It is created in the Manage Project Execution and Control phase.
- D. It is the single most important work product produced by the project manager.
- E. It is created by the project manager and the client.
- F. It is a conceptual work product comprised of process components detailing the tools and/or approach for each OUM Manage process.

Answer: A,D,E

Explanation:

Explanation: *In OUM Manage, one of the first activities that occur during the Project Startup phase involves the Project Manager and the client (Project Sponsor) jointly creating the

Project Management Framework. This framework establishes the ground rules for the project and is the first step in communicating, establishing trust, and setting expectations. The key focus for the remainder of the Project Startup Phase is to evolve the Project Management Framework into a detailed Project Management Plan based on the agreed upon foundation. *The project manager creates the project management plan following input from the project team and key stakeholders. The plan should be agreed and approved by at least the project team and its key stakeholders.

Incorrect:

Not A: Project Execution and Control runs concurrently with the Implement focus area phases. The purpose of the Project Execution and Control Phase is to provide adequate visibility into actual progress so that management can take effective actions when the project's performance deviates significantly from the project plans. The Project Execution and Control Phase includes tracking and reviewing the project's accomplishments and results against documented WBS, project estimates, time schedule, resources plan, and cost budget, and adjusting these plans based on the actual accomplishment and results.

NEW QUESTION: 2

Which of the following is used to type or paste recovery commands directly into a Linux box?

- A. Restore/snapshot
- B. Shell/terminal
- C. Backup/time machine
- D. Command/cmd

Answer: B
