#### **NEW QUESTION: 1**

While reviewing the result of scanning run against a target network you come across the following:

Which among the following can be used to get this output?

- A. A Bo2k system query.
- B. nmap protocol scan
- C. An SNMP walk
- D. A sniffer

**Answer: C**

Explanation:

SNMP lets you "read" information from a device. You make a query of the server (generally known as the "agent"). The agent gathers the information from the host system and returns the answer to your SNMP client. It's like having a single interface for all your informative Unix commands. Output like `system.sysContact.0` is called a MIB.

### **NEW QUESTION: 2**

DRAG DROP

You administer the Office 365 tenant for an organization. You assign Enterprise E5 licenses to all users.

You need to configure Office 365 to send emails that contain malware to separate mailbox for review.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

**Answer:**

Explanation:
