**Answer:**  
Explanation:  
See explanation below.

## Explanation

1. After signing in to the Microsoft 365 admin center, select Security, Threat Management, Policy, then ATP Anti-phishing.
2. Select Default Policy to refine it.
3. In the Impersonation section, select Edit.
4. Go to Add domains to protect and select the toggle to automatically include the domains you own.
5. Go to Actions, open the drop-down If email is sent by an impersonated user, and choose the Quarantine message action. Open the drop-down If email is sent by an impersonated domain and choose the Quarantine message action.
6. Select Turn on impersonation safety tips. Choose whether tips should be provided to users when the system detects impersonated users, domains, or unusual characters. Select
7. Select Mailbox intelligence and verify that it's turned on. This allows your email to be more efficient by learning usage patterns.
8. Choose Add trusted senders and domains. Here you can add email addresses or domains that shouldn't be classified as an impersonation.
9. Choose Review your settings, make sure everything is correct, select , then Close.
