NEW QUESTION: 1

You develop a Microsoft SQL Server 2012 server database that supports an application. The application contains a table that has the following definition:

```
CREATE TABLE Inventory
(ItemID int NOT NULL PRIMARY KEY,
ItemsInStore int NOT NULL,
ItemsInWarehouse int NOT NULL)
```

You need to create a computed column that returns the sum total of the ItemsInStore and ItemsInWarehouse values for each row.

Which Transact-SQL statement should you use?

- A.** ALTER TABLE Inventory
ADD TotalItems AS SUM(ItemsInStore, ItemsInWarehouse);
- B.** ALTER TABLE Inventory
ADD TotalItems AS ItemsInStore + ItemsInWarehouse
- C.** ALTER TABLE Inventory

ADD TotalItems = ItemsInStore + ItemsInWarehouse
D. ALTER TABLE Inventory
ADD ItemsInStore - ItemsInWarehouse = TotalItemss

Answer: B

NEW QUESTION: 2

What is the purpose of the Immediate Interval setting in a CPM policy?

- A. To Control the maximum amount of time the CPM will wait for a password change to complete.
- B. To control how often the CPM looks for System Initiated CPM work.
- C. To control how often the CPM rests between password changes.
- D. To control how often the CPM looks for User Initiated CPM work.

Answer: D

Explanation:

When the Master Policy enforces check-in/check-out exclusive access, passwords are changed when the user clicks the Release button and releases the account. This is based on the ImmediateInterval parameter in the applied platform. If the user forgets to release the account, it is automatically released and changed by the CPM after a predetermined number of minutes, defined in the MinValidityPeriod parameter specified in the platform

NEW QUESTION: 3

The end result of implementing the principle of least privilege means which of the following?

- A. Authorization creep.
- B. Users can access all systems.
- C. Users would get access to only the info for which they have a need to know
- D. Users get new privileges added when they change positions.

Answer: C

Explanation:

Explanation/Reference:

The principle of least privilege refers to allowing users to have only the access they need and not anything more. Thus, certain users may have no need to access any of the files on specific systems.

The following answers are incorrect:

Users can access all systems. Although the principle of least privilege limits what access and systems users have authorization to, not all users would have a need to know to access all of the systems. The best answer is still Users would

get access to only the info for which they have a need to know as some of the users may not have a need to access a system. Users get new privileges when they change positions. Although true that a user may indeed require new privileges, this is not a given fact and in actuality a user may require less privileges for a new position. The principle of least privilege would require that the rights required for the position be closely evaluated and where possible rights revoked. Authorization creep. Authorization creep occurs when users are given additional rights with new positions and responsibilities. The principle of least privilege should actually prevent authorization creep.
