NEW QUESTION: 4

You are tasked with creating a group called volumeBackupAdmins to manage only block volume backups.

Which of the following set of policy/policies would you need to write to meet this requirement?

A)

B)

C)

D)

A. Option B

B. Option A

C. Option D

D. Option C

Answer: B

Explanation:

Explanation

Let volume backup admins manage only backups

Type of access: Ability to do all things with volume backups, but not create and manage volumes themselves.

This makes sense if you want to have a single set of volume backup admins manage all the volume backups in all the compartments. The first statement gives the required access to the volume that is being backed up; the second statement enables creation of the backup (and the ability to delete backups). The third statement enables the creation and management of user defined backup policies; the fourth statement enables assignment and removal of assignment of backup policies.

Where to create the policy: In the tenancy, so that the access is easily granted to all compartments by way of policy inheritance. To reduce the scope of access to just the volumes and backups in a particular compartment, specify that compartment instead of the tenancy.

Allow group VolumeBackupAdmins to use volumes in tenancy

Allow group VolumeBackupAdmins to manage volume-backups in tenancy

If the group will be using the Console, the following policy gives a better user experience:

Allow group VolumeBackupAdmins to use volumes in tenancy

Allow group VolumeBackupAdmins to manage volume-backups in tenancy

Allow group VolumeBackupAdmins to inspect volume-attachments in tenancy

Allow group VolumeBackupAdmins to inspect instances in tenancy
