Top one actual lab questions.

NEW QUESTION: 1

With FSSO, a domain user could authenticate either against the domain controller running the Collector Agent and Domain Controller Agent, or a domain controller running only the Domain Controller Agent.

If you attempt to authenticate with the Secondary Domain Controller running only the Domain Controller Agent, which of the following statements are correct? (Select all that apply.)

- A. The Collector Agent performs the DNS lookup for the authenticated client's IP address.
- B. The FortiGate unit receives the user information from the Domain Controller Agent of the Secondary Controller.
- C. The user cannot be authenticated with the FortiGate device in this manner because each Domain Controller Agent requires a dedicated Collector Agent.
- D. The login event is sent to the Collector Agent.

Answer: A,D
