#### **NEW QUESTION: 1**

Sie sind Administrator eines Microsoft SQL Server-Datenbankservers.

Einige Anwendungen verbrauchen erhebliche Ressourcen. Sie müssen die Serverauslastung verwalten, indem Sie ressourcenintensive Anwendungen einschränken. Sie müssen den Ressourcenverbrauch dynamisch begrenzen.

Was tun?

**A.** Erstellen Sie einen neuen Planungsleitfaden mit einem Gültigkeitsbereichstyp "sql" und definieren Sie die Ressourcenbeschränkungen für jede Anwendung.

**B.** Konfigurieren Sie erweiterte Ereignisse, um die für jeden Anwendungstyp zulässigen Ressourcenlimits zu überwachen und einzuschränken.

**C.** Aktivieren Sie den Resource Governor und konfigurieren Sie dann Ressourcenpools, Workloadgruppen und die Klassifizierungsfunktion.

**D.** Konfigurieren Sie SQL Activity Monitor so, dass für jeden Anwendungstyp Ressourcenlimits definiert werden.

**Answer: C**

Explanation:

Explanation

SQL Server Resource Governor is a feature than you can use to manage SQL Server workload and system resource consumption. Resource Governor enables you to specify limits on the amount of CPU, physical IO, and memory that incoming application requests can use.

The following three concepts are fundamental to understanding and using Resource Governor:

## **NEW QUESTION: 2**

Rick works as an Office Assistant for Tech Perfect Inc. The company has a Windows- based network. He is creating a form through Microsoft Excel 2013.

He wants to enable worksheet forms to satisfy the flexible design requirements and to customize their appearance, behavior, fonts, and other characteristics.

Which of the following will Rick use to accomplish the task?

- A.** Trust Center
- B.** Accounting template
- C.** Form control
- D.** ActiveX control

**Answer: D**

Explanation:

Explanation/Reference:

Explanation:

ActiveX controls are used on worksheet forms, with or without the use of VBA code, and on VBA UserForms. They are used when a user needs more flexible design requirements than those provided by Form controls. They have extensive properties that can be used to customize their appearance, behavior, fonts, and other characteristics. The user can control different events that occur when an ActiveX control is interacted with. He can also write macros that respond to events associated with the ActiveX controls.

When a user interacts with the control, the VBA code runs to process any events that occur for that control.

The ActiveX controls cannot be added to chart sheets from the user interface or to XLM macro sheets. It is not possible to assign a macro to run directly from the ActiveX control.

Incorrect Answers:

**A:** A form control is an original control that is compatible with old versions of Excel, beginning with Excel version 5. 0. It is designed for use on XLM macro sheets. It can be used when a user wants to simply interact with cell data without using VBA code and when he wants to add controls to chart sheets. By using form controls, the user can run macros. He can attach an existing macro to a control, or write or record a new macro.

These controls cannot be added to UserForms, used to control events, or modified to run Web scripts on Web pages.

B: The accounting template is used for numbering months of a financial year to period numbering. It is used to compare month to month, actual v budget, quarter to quarter, year to year variances. It is the initial point for other reports that need the use of months.

C: Trust Center is where a user can find security and privacy settings for Microsoft Office 2013 programs.
