**NEW QUESTION: 3**

Which technology can be used to prevent flooding of IPv6 multicast traffic on a switch?

A. IGMP filtering

B. MLD filtering

C. MLD snooping

D. IGMP snooping

**Answer: C**

Explanation:

MLD snooping allows the switch to examine MLD packets and make forwarding decisions based on their content. You can configure the switch to use MLD snooping in subnets that receive MLD queries from either MLD or the MLD snooping querier. MLD snooping constrains IPv6 multicast traffic at Layer 2 by configuring Layer 2 LAN ports dynamically to forward IPv6 multicast traffic only to those ports that want to receive it. Reference.
