https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/create-wip-policy-using-intune#exempt-apps-from-wip-restrictions

NEW QUESTION: 3
In which scenario does the Applications DBA need to run the Rapid Clone utility?
A. There is a need for another Oracle Applications system to test the patches to be applied on the Production system. Currently, QWERTcompany has five Oracle Applications systems including Production. The Production and Test systems are on Release 12.2.10 and the remaining systems are on Release 12.2.9. The Applications DBA plans to run the Oracle utility on the Test system to test the patch.
B. There was a hardware disk failure on the Development server. The Development system was being used to test the application patches. The POIUYcompany has only two systems: Development and Production. As soon as the hardware disk failure is resolved on the Development server, there is a need to rebuild that Development system. The Applications DBA plans to run the Oracle utility to rebuild the Development system.
C. There are two systems (Test and Production) for XYZcompany. There are invalid objects being encountered in the Production system. The errors are not happening on the Test system.The Applications DBA plans to run the Oracle utility on the Production system to fix the invalid objects.
D. ABC company has three systems: Development, Test, and Production. Testing of the Oracle Applications patches are being done on the Test system and being promoted to Development for further testing. After the patches are tested in the Test and Development systems without any issues, they would be promoted to the Production system. The Applications DBA plans

to run the Oracle utility for the promotion of the patch.
Answer: B
