recognized as one of the most reliable and authoritative dumps provider, Our efficient staff is always at your service and delivers you promptly response to your queries.

If you make your decision of them, you are ready to be thrilled with the desirable results from now on, Our HPE0-J69 exam questions mainly have three versions which are PDF, Software [Pdf C-THR95-2105 Braindumps](#) and APP online, and for their different advantafes, you can learn anywhere at any time.

2022 High Pass-Rate HPE0-J69: Delta - HPE Storage Solutions Valid Braindumps Book

Besides we provide one year free updates of our HPE0-J69 training braindump and service warranty for buyers, If you failed , You can send the score report to us.We will give you **HPE0-J69 Valid Braindumps Book** a FULLY REFUND of your purchasing fee OR send you another same value product for free.

With the good HPE0-J69 latest prep torrent, you can get your certification at your first try, After the payment, you can instantly download HPE0-J69 exam dumps, and as long as there is any HPE0-J69 exam software updates in one year, our system will immediately notify you.

HPE0-J69 real questions files are professional and has high passing rate so that users can pass exam at the first attempt, Our HPE0-J69 practice materials make it easier to prepare exam with a variety of high quality functions.

If you choose our HPE0-J69 dumps VCE, something will be different, Besides our excellent HPE0-J69 exam torrent, we also offer the golden customer service, The last but not least, we can provide you with a free trial service on the HPE0-J69 exam questions.

Comparing to spending many money and time on exams they prefer to spend HPE0-J69 exam collection cost and pass exam easily, especially the HPE0-J69 exam cost is really expensive and they do not want to try the second time.

The Delta - HPE Storage Solutions certification for the workers in the new century has been [Delta - HPE Storage Solutions](#) accepted to be a certification of sovereign importance-a certification which will set you apart and gain you immediate respect and credibility.

#### **NEW QUESTION: 1**

Your company has a private cloud that is managed by using a System Center 2012 Operations Manager infrastructure.

From Operations Manager, you create a group named Group1. You add multiple servers to Group1.

You have an Active Directory group named Group2.

You configure a dashboard for the users in Group2 to manage the client computers in Group1.

You need to ensure that the users in Group2 can achieve the following tasks:

View open critical alerts generated by Group1.

Identify whether a monitor generated an alert.

Which object should you add to the dashboard?

- A. An alert widget
- B. An event view
- C. An alert view
- D. A state view
- E. A state widget

**Answer: A**

Explanation:

Explanation/Reference:

Explanation:

Adding an alert widget to a dashboard

Step 1: In an empty dashboard cell, click on the "Click to add widget" link.

This opens the New Dashboard and Widget Wizard.

Step 2: Now you are presented with a selection of the available widgets.

Select Alert Widgets and then click Next.

Step 3: Once you give your widget a name and a description, you can choose a group or object for which to display alerts.

The ability to select between "Groups" and "Groups and objects" allows you to change the scope of objects for which you will receive alerts.

If you only want to target a certain object within a group or class, the

"Groups and objects" option allows you to do so, while the "Groups" option enables you to view alerts for all objects within the group you choose.

Step 4: Next you can specify the criteria for the alerts you will receive.

You may choose the Severity, Priority, and Resolution State of the alerts.

For example, I will receive alerts for warnings and information of all priority, and in either the new or closed state.

Step 5: Lastly, select the columns to display for each alert.

You can also decide how the alerts are sorted by default as well as how they are grouped.

One great addition to the alert widget that is not present in the alert view is the addition of the "Is Monitor Alert" column.

This column allows you to see whether the alert was generated by monitor rather than a rule.

In my example, I will group alerts by "Is Monitor Alert" and sort by "Last Modified".

And there you have it.

We've configured a dashboard with a powerful alert widget.

It is a great way to quickly view the alerts you care about organized in the way you want.

If you aren't satisfied with your configuration or if your needs change, you can always click the button which gives you the option to reconfigure, personalize, or remove your widget. Reconfiguring a widget opens a wizard with your previously chosen widget configuration and allows you to change all of options to keep up to date with your needs.

Here you can change everything from the groups or objects targeted, to the name of the widget.

Personalizing a widget allows you to change the display options for that widget.

Here you can change which columns are displayed and how your alerts are grouped and sorted.

This allows you to view the alerts within a context that is most appropriate to you, but without having to worry about the primary configuration details.
