NEW QUESTION: 1

An administrator navigates to NetBackup Management > Catalog, and selects Action: Import. After clicking the Search Now button, the following message appears:

Which step must the administrator perform in order to get search results?

- A. run the Initiate Import command in the Catalog > Action menu
- B. enable Catalog > Override default priority, and increase the Job Priority value
- C. run the "Recover the catalogs" wizard
- D. increase the "Catalog cleanup wait time" in the Clean-up host property

Answer: A

NEW QUESTION: 2

A corporation has implemented Oracle Fusion Workforce Compensation. A custom element was created to capture the entry value for four input values. Data load is performed by the Batch Loader, but the associated Daily Business Intelligence (DBI) is returning the entry value corresponding only to the first input value.

Identify the option that will enable the DBI to return all the input variables. (Choose the best answer.)

- A. Delete the existing element link and create a new element link, which will automatically create all four input values.
- B. Create status processing rules for the input values.
- C. This scenario cannot be implemented.
- D. Create a new element from scratch.

Answer: D

NEW QUESTION: 3

You are writing code to create and run an Azure Batch job.
