NEW QUESTION: 2

You need to configure availability for the virtual machines that the company is migrating to Azure.

What should you implement?

- A. Traffic Manager
- B. Express Route
- C. Cloud Services
- D. Update Domains

Answer: D

Explanation:

Explanation/Reference:

Each virtual machine in your availability set is assigned an update domain and a fault domain by the underlying Azure platform. For a given availability set, five non-user-configurable update domains are assigned by default (Resource Manager deployments can then be increased to provide up to 20 update domains) to indicate groups of virtual machines and underlying physical hardware that can be rebooted at the same time.
