NEW QUESTION: 1
Hyperledger Composer has two main components.
What are the two components? (Select two.)
A. Playground
B. Sawtooth
C. Business Network Archive
D. Fabric
E. Explorer
F. SDK
Answer: A,C
Explanation:
Explanation
Hyperledger Composer has following main components: 1) Business
Network Archive: Capturing the core data in a business network,
including the business model, transaction logic, and access
controls, the Business Network Archive packages these elements
up and deploys them to a runtime. Business Network Archive
files are stored as ".bna" files. 2) Composer Playground: This
web-based tool allows developers to learn Hyperledger Composer,
model out their business network (domain), test that network,
and deploy that network to a live instance of a blockchain
network. The playground keeps the development model in browser
storage, allowing them to be easily uploaded or downloaded. The
playground also allows for CRUD (create, read, update, delete)
operations to be performed on asset transactions which are
created and logged. Composer playground offers a repository of
sample business networks that can provide a base for building
your own business network

NEW QUESTION: 2
