- A. It is solely the responsibility of the customer
- B. It is solely the responsibility of AWS
- C. It is shared between AWS and the customer
- D. It is not part of the AWS shared responsibility model

**Answer: C**

**NEW QUESTION: 3**

Microsoft Azure is a cloud computing service that provides a wide range of services, including virtual machines, storage, and networking. One of the key features of Azure is its ability to provide a secure and compliant environment for your data. This is achieved through a variety of security and compliance features, including encryption, access control, and auditing. Azure also provides a range of tools and services to help you manage your data and protect it from threats. For example, Azure Key Vault is a service that allows you to store and manage your cryptographic keys and secrets. Azure also provides a range of compliance certifications, including ISO 27001 and SOC 2, to help you demonstrate your commitment to security and compliance. In addition, Azure provides a range of security and compliance tools, including Azure Security Center, which provides a centralized view of your security and compliance posture. Azure also provides a range of security and compliance services, including Azure Key Vault, which allows you to store and manage your cryptographic keys and secrets. Azure also provides a range of security and compliance services, including Azure Key Vault, which allows you to store and manage your cryptographic keys and secrets.

**Answer:**

Explanation:

Explanation

Create a new Azure Data Lake Storage account with Azure Data Lake managed encryption keys For Azure services, Azure Key Vault is the recommended key storage solution and provides a common management experience across services. Keys are stored and managed in key vaults, and access to a key vault can be given to users or services. Azure Key Vault supports customer creation of keys or import of customer keys for use in customer-managed encryption key scenarios.

Note: Data Lake Storage Gen1 account Encryption Settings. There are three options:

- \* Do not enable encryption.
- \* Use keys managed by Data Lake Storage Gen1, if you want Data Lake Storage Gen1 to manage your encryption keys.
- \* Use keys from your own Key Vault. You can select an existing Azure Key Vault or create a new Key Vault. To use the keys from a Key Vault, you must assign permissions for the Data Lake Storage Gen1 account to access the Azure Key Vault.

**NEW QUESTION: 4**

HOTSPOT

## Active Directory

### **Answer:**

Explanation:

Explanation:

Marketing: Click-to-Run

Users in the marketing department frequently change their computer and must reinstall Office.

Accounting: Windows Installer (MSI)

Users in the accounting department have access to Windows by using Remote Desktop Services (RDS). All client applications, including Office, are made available through Remote Desktop sessions.

Research: Windows Installer (MSI)

Users in the research department deal with highly sensitive patents; therefore, they do not have access to the Internet from their computer.

Note: The default method for an Office 365 user to install an Office product, such as Office

365 ProPlus or Visio Pro for Office 365, on a computer is to use the Office 365 portal.

When a user installs an Office product from the Office 365 portal, Click-to-Run is used to stream the necessary files from the Internet to the user's computer and install the Office product
