- C. â°ã•~è¾¼ã, •
- D. â>žã¾©

Answer: D

NEW QUESTION: 2

When supervising others, a PRMIA member must comply with

- A. the standards of the organization where the work is being performed
- B. PRMIA Standards
- C. local regulatory authority standards which may be less onerous than PRMIA standards
- D. his / her established personal standards of work approved in previous work situations

Answer: B

NEW QUESTION: 3

Welcher Prozess hat das folgende Ziel: "Erstellen Sie Service Design Packages (SDPs) basierend auf Service-Chartas und Änderungsanforderungen"?

- A. Service Level Management
- B. Planung und Support für Serviceübergänge
- C. Designkoordination
- D. Änderungsmanagement

Answer: C

NEW QUESTION: 4

A company hosts a critical web application on the AWS Cloud. This is a key revenue generating application for the company. The IT Security team is worried about potential DDos attacks against the web site. The senior management has also specified that immediate action needs to be taken in case of a potential DDos attack. What should be done in this regard?

Please select:

- A. Consider using Cloudwatch logs to monitor traffic for DDos attack and quickly take actions on a trigger of a potential attack.
- B. Consider using the AWS Shield Advanced Service
- C. Consider using VPC Flow logs to monitor traffic for DDos attack and quickly take actions on a trigger of a potential attack.
- D. Consider using the AWS Shield Service

Answer: B

Explanation:

Explanation

Option A is invalid because the normal AWS Shield Service will not help in immediate action against a DDos attack. This can be done via the AWS Shield Advanced Service Option B is invalid because this is a logging service for VPCs traffic flow but cannot specifically protect against DDos attacks.

Option D is invalid because this is a logging service for AWS Services but cannot specifically protect against DDos attacks. The AWS Documentation mentions the following AWS Shield Advanced provides enhanced protections for your

applications running on Amazon EC2. Elastic Load Balancing (ELB), Amazon CloudFront and Route 53 against larger and more sophisticated attacks. AWS Shield Advanced is available to AWS Business Support and AWS Enterprise Support customers. AWS Shield Advanced protection provides always-on, flow-based monitoring of network traffic and active application monitoring to provide near real-time notifications of DDoS attacks. AWS Shield Advanced also gives customers highly flexible controls over attack mitigations to take actions instantly. Customers can also engage the DDoS Response Team (DRT) 24X7 to manage and mitigate their application layer DDoS attacks. For more information on AWS Shield, please visit the below URL: <https://aws.amazon.com/shield/faqs>; The correct answer is: Consider using the AWS Shield Advanced Service Submit your Feedback/Queries to our Experts
