If you choose the online version of our TE350b-002 study materials, you can use our products by your any electronica equipment, What you have learned will finally pay off.

NEW QUESTION: 1

Which of AMP's File capabilities deals with the problem of files passing through perimeter defenses that are later discovered to be a threat?

- A. Malware Security
- B. File Retrospection
- C. Dynamic Analytics
- D. Trajectory

Answer: B

Explanation:

Explanation/Reference:

Explanation:

Tracks the spread of any file within your network and continuously monitors file reputation over time. If a file reputation changes to malicious or is found by file sandboxing to be malicious, AMP provides retrospective alerting in the after phase. AMP identifies every instance of the file within your network to address the problem of malicious files passing through perimeter defenses that are later deemed a threat.
