Also mention your preferred solution, Free 1Z0-1090-21 Dumps product Extension or Product Exchange instead of refund.

NEW QUESTION: 1

You need to recommend a solution to migrate the Listings database to the cloud.

What should you recommend?

A. Implement merge replication between the main office and the Azure virtual machine.

B. Stage the Listings database on an Azure virtual machine prior to the outage. During the outage, perform a data import from the main office by using SQL Server Management Studio.

C. Run a full backup during the outage and restore the backup to the Azure virtual machine.

D. Enable mirroring between the main office and the Azure virtual machine. During the planned outage, change the mirroring roles on the Azure virtual machine to become the primary server, and then break the mirror.

Answer: D

Explanation:

Explanation/Reference:

Explanation:

<https://blogs.msdn.microsoft.com/buckwoody/2013/01/08/microsoft-windows-azure-disaster-recovery-options-for-on-premises-sql-server/> Testlet 1 Overview Contoso, Ltd. is a national scientific research company that has sales, marketing, and research departments.

Contoso has a main office in Dallas and more than 20 satellite offices across the United States. Some employees work off-site at customer locations.

Contoso is expected to double in size during the next two years.

Existing Environment

The Microsoft SQL Server environment contains the servers configured as shown in the following table.

Contoso currently uses SQL Server 2008 R2 on all of the database servers. SQL01 currently requires six cores and 50 GB of memory.

Once a day, database snapshots are taken on the mirror to provide ad hoc reporting and to load the data warehouse.

One report is used for ad hoc reporting by using the mirrored copy of the OLTP database.

Research Gen II is a Windows application that users currently access by using Remote Desktop.

Requirements

Business Goals

Contoso identifies the following business goals:

Minimize the costs associated with purchasing hardware and

software.

Prevent any negative impact on performance when moving database platforms to the cloud.

Audit user access to and query execution on all of the databases in the research department.

Planned changes

Contoso plans to implement the following changes:

Upgrade SQL03 from SQL Server 2008 R2 to SQL Server 2014 on Windows Server 2012 R2.

Migrate SQL01 and SQL02 to Infrastructure as a Service (IAAS) on SQL Server 2014.

Leverage cloud services for a disaster recovery location and for high availability.

Replace Research Gen II with a cloud-based application named One Research. The database for this

application will be migrated to a cloud service.

Departmental Requirements

Senior research project leaders must be able to upload databases to the cloud. Initially, the databases will be less than 3 GB. Some databases may grow to 50 GB. The databases must be recoverable to any point during the past two weeks.

The research project leaders must monitor the performance of their databases. They must view statistics, such as query performance and overall database performance.

The marketing department plans to use cloud services to host web applications for marketing campaigns.

The databases for the web applications have the requirements shown in the following table.

Technical Requirements

Contoso identifies the following technical requirements:

OLTP will be offloaded to Microsoft Azure virtual machines.

The data for One Report must not be more than 15 minutes old.

All of the databases for the OLTP system must be implemented on solid state drives (SSDs).

A solution for the OLTP system must be created to provide disaster recovery and reporting between

SQL01 and SQL02.

All databases, except for the research and marketing databases, must be recoverable to any point

during the last 30 days.

A solution for the data warehouse system must be created to provide disaster recovery between SQL03

and an Azure virtual machine named SQL04.

NEW QUESTION: 2

Which of the manager is responsible for providing information about the short- and medium-term financial situation as a basis for financial planning ?

- A. Amount-based commodities
- B. Fund manager
- C. Project Owners
- D. Surrogate Bidders

Answer: B

NEW QUESTION: 3

Which of the following is correct about operators undertaking special work (for example, constructors working at heights, electricians, and welders)?

- A. An experienced operator does not need to attend trainings or obtain the required work certificate.
- B. An experienced operator only needs to attend training but does not need to obtain the required work certificate.
- C. An operator needs to attend required safety technology trainings and pass related appraisals, and obtain the required work certificate.
- D. An operator only needs to attend required safety technology trainings and pass related appraisals. No certificate is required.

Answer: C
