NEW QUESTION: 1

The alternate processing strategy in a business continuity plan can provide for required backup computing capacity through a hot site, a cold site, or

- A. An off-site storage replacement.
- B. An online backup program.
- C. A dial-up services program.
- D. A crate and ship replacement.

Answer: B

Explanation:

What I believe is being wanted here is not the other data center backup alternatives but transaction redundancy

implementation. The CISSP candidate should understand the three concepts used to create a level of fault tolerance and redundancy in transaction processing. While these processes are not used solely for disaster recovery, they are often elements of a larger disaster recovery plan. If one or more of these processes are employed, the ability of a company to get back online is greatly enhanced. Ronald Krutz The CISSP PREP Guide (gold edition) pg 394 (they are Electronic Vaulting, Remote journaling, and Database shadowing)
