**NEW QUESTION: 1**

Universal Containers has a highly customized Salesforce org, with many different pieces of configuration and code. Which configuration item should be covered by executable tests?

- A. Workflow Rules
- B. Validation Rules
- C. Active Process Builders
- D. Case Assignment Rules

**Answer: C**

**NEW QUESTION: 2**

When users log on to Citrix Receiver they are NOT able to see their line-of-business application by default and are frequently calling helpdesk to locate the application. Which phrase can a Citrix Administrator add to the application properties, so that it is added to Favorites and users CANNOT remove the application from Favorites?

- A. "KEYWORDS: Mandatory"
- B. "KEYWORDS: Auto"
- C. "KEYWORDS: Prefer"
- D. "KEYWORDS: Featured"

**Answer: A**

Explanation:

To make an individual app mandatory, so that it cannot be removed from Citrix Receiver for Windows, append the string KEYWORDS:Mandatory to the application description. There is no Remove option for users to unsubscribe to mandatory apps.

**NEW QUESTION: 3**

Which of the following devices has a 15-pin 3 row connector?

- A. VGA monitor
- B. Parallel port
- C. Joystick port
- D. Serial port

**Answer: A**

Explanation:

The VGA monitor uses a 15-pin 3 row connector to connect to a video adapter. Older Color Graphic Array (CGA) video standard monitors use 9-pin connectors to connect to DB-9 female connectors on CGA adapters. Answer option D is incorrect. Serial port is the primary means for connecting modems and mouse to a computer. There are two types of serial port connectors, 9-pin and 25-pin. The word serial refers to the that data is sent in series, one bit at a time, over a single wire. This design is significantly slower than sending 8 bits at a time via a parallel channel, but serial signals can travel much farther without degradation. Answer option A is incorrect. The joystick port has a 15-pin 2 row male connector. Answer option C is incorrect. A parallel port is a 25-pin 2 row female connector on the back of a PC.

It is used to connect printers, scanners, etc. A parallel port transfers information between

computers and peripheral devices 8 bits at a time.

ECP, EPP, and SPP are types of parallel ports.
