NEW QUESTION: 2
When a routing protocol is introduced with other route-out protocols, in order to introduce only a part of the routing information that satisfies the conditions and set some attributes of the introduced information, only the route-policy tool can be used.
A. TRUE
B. FALSE
Answer: A

NEW QUESTION: 3
An IS auditor is performing an audit of a network operating system. Which of the following is a user feature the IS auditor should review?
A. Handling file transfer between hosts andinteruser communications
B. Support of terminal access to remote hosts
C. Availability of online network documentation
D. Performance management, audit and control
Answer: C
Explanation:
Network operating system user features include online availability of network documentation. Other features would be user access to various resources of network hosts, user

authorization to access particular resources, and the network and host computers used without special user actions or commands. Choices B, C and D are examples of network operating systems functions.
