NEW QUESTION: 1
On January 2, 1993, Quo, Inc. hired Reed to be its controller. During the year, Reed, working closely with Quo's president and outside accountants, made changes in accounting policies, corrected several errors dating from 1992 and before, and instituted new accounting policies.
Quo's 1993 financial statements will be presented in comparative form with its 1992 financial statements.
This question represents one of Quo's transactions. List B represents the general accounting treatment required for these transactions. These treatments are:
* Cumulative effect approach - Include the cumulative effect of the adjustment resulting from the accounting change or error correction in the 1993 financial statements, and do not restate the 1992 financial statements.
* Retroactive or retrospective restatement approach - Restate the 1992 financial statements and adjust 1992 beginning retained earnings if the error or change affects a period prior to 1992.
* Prospective approach - Report 1993 and future financial statements on the new basis but do not restate 1992 financial statements.

Explanation

Modify the NS record, not the SOA record.
Note: The SOA record stores information about the name of the server that supplied the data for the zone; the administrator of the zone; the current version of the data file; the number of seconds a secondary name server should wait before checking for updates; the number of seconds a secondary name server should wait before retrying a failed zone transfer; the maximum number of seconds that a secondary name server can use data before it must either be refreshed or expire; and a default number of seconds for the time-to-live file on resource records.
