The offer is enough to make you confident on our brilliant product.

NEW QUESTION: 1

All of the following are supply side policies to promote economic growth except which one?

- A. Reduction of marginal rates of income tax.
- B. Tax relief for business expenditure on research and development.
- C. Deregulation of the financial sector.
- D. Tariffs to encourage domestic suppliers of goods.

Answer: D

NEW QUESTION: 2

Sie haben eine Ressourcengruppe mit dem Namen RG1.

Sie planen, virtuelle Netzwerke und App-Dienste in RG1 zu erstellen.

Sie müssen die Erstellung virtueller Maschinen nur in RG1 verhindern.

Was solltest du verwenden?

- A. Eine Azure-Richtlinie
- B. ein Schloss
- C. eine Azure-Rolle
- D. ein Tag

Answer: A

Explanation:

Azure policies can be used to define requirements for resource properties during deployment and for already existing resources. Azure Policy controls properties such as the types or locations of resources.

Azure Policy is a service in Azure that you use to create, assign, and manage policies. These policies enforce different rules and effects over your resources, so those resources stay compliant with your corporate standards and service level agreements.

In this question, we would create a Azure policy assigned to the resource group that denies the creation of virtual machines in the resource group.

You could place a read-only lock on the resource group.

However, that would prevent the creation of any resources in the resource group, not virtual machines only. Therefore, an Azure Policy is a better solution.
