Because the most clients may be busy in their jobs or other significant things, the time they can spare to learn our OGD-001 learning guide is limited and little.

NEW QUESTION: 1

Refer to the exhibit.

Based on the information given, which switch will be elected root bridge and why?

- A. Switch B, because it has the highest MAC address
- B. Switch A, because it has the lowest MAC address
- C. Switch C, because it has the lowest priority
- D. Switch C, because it is the most centrally located switch
- E. Switch D, because it has the highest priority
- F. Switch A, because it is the most centrally located switch

Answer: C

Explanation:

To elect the root bridge in the LAN, first check the priority value. The switch having the lowest priority will win the election process. If Priority Value is the same then it checks the MAC Address; the switch having the lowest MAC Address will become the root bridge. In this case, switch C has the lowest MAC Address so it becomes the root bridge.

NEW QUESTION: 2

Answer:

Explanation:

NEW QUESTION: 3

You have the following two queries in Power BI Desktop:

- * A query named Query1 that retrieves a table named SMB_Customers from a Microsoft SQL Server database
