You have a WebJob object that runs as part of an Azure website. The WebJob object uses features from the Azure SDK for .NET.
You use a well-formed but invalid storage key to create the storage account that you pass into the UploadDataToAzureStorage method.
The WebJob object contains the following code segment. Line numbers are included for reference only.

Answer:
Explanation:

Explanation:

For blob storage, there is a retry policy implemented by default, so if you do nothing, it will do what's called exponential retries. It will fail, then wait a bit of time and try again; if it fails again, it will wait a little longer and try again, until it hits the maximum retry count.
