You are an experienced Project Manager that has been entrusted with a project to develop a machine which produces auto components. You have scheduled meetings with the project team and the key stakeholders to identify the risks for your project. Which of the following is a key output of this process?
A. Risk Categories
B. Risk Breakdown Structure
C. Risk Management Plan
D. Explanation:
The primary outputs from Identify Risks are the initial entries into the risk register. The risk register ultimately contains the outcomes of other risk management processes as they are conducted, resulting in an increase in the level and type of information contained in the risk register over time.
E. Risk Register
Answer: E
Explanation:
D, and C are incorrect. All these are outputs from the "Plan Risk Management" process, which happens prior to the starting of risk identification.
